Purpose

At Tanrikulu Plastik, we regard sustainability as an integral part of our environmental, social and economic responsibilities. In conducting our activities, we adopt as fundamental principles the efficient use of natural resources, the reduction of our environmental impacts, the protection of our employees' health and safety, and the provision of safe, high-quality products to our customers.

Our Commitments

Environmental Protection

- We aim to continually reduce the environmental impacts arising from our activities.
- We use energy, water and natural resources efficiently.
- We support reducing waste at source, reuse and recycling.
- We carry out initiatives to reduce our greenhouse gas emissions.
- We take the measures necessary to prevent environmental pollution.

Circular Economy

- We support the use of recycled raw materials in applications where they are safe and suitable.
- We undertake initiatives to improve the recyclability of our products.
- We aim to develop products for the packaging sector in accordance with circular-economy principles.

Legal Compliance

- We fully comply with applicable environmental, occupational health and safety, and product-safety legislation in every country where we operate.
- We closely monitor European Union and other international regulations and maintain product compliance.

Product Safety and Quality

- We provide customers with safe, high-quality and legally compliant products.
- We support raw-material traceability and continually improve our quality-control processes.
- For food-contact products, compliance with relevant national and international regulations is fundamental.

Our Employees

- We undertake to provide a safe and healthy working environment for our employees.
- We support training, development and employee participation.
- We foster a workplace culture that respects human rights, opposes discrimination and promotes equal opportunity.

Ethical Approach to Business

- We conduct all activities with integrity and transparency and in accordance with ethical rules.
- We apply zero tolerance to corruption, bribery and all forms of fraud.
- We encourage our suppliers to act in accordance with sustainability principles.

Continual Improvement

- We regularly review, measure and improve our sustainability performance.
- We monitor technological developments and support investments that improve resource efficiency.
- We regard our sustainability objectives as an integral part of our corporate strategy.

Conclusion

With a responsibility to leave a more liveable world to future generations, Tanrikulu Plastik adopts an environmentally responsible, socially beneficial and economically sustainable approach to production and undertakes to work towards this goal together with all stakeholders.
